PROJECTS/EVENTS

Course Load | *React.js, Next.js, Tailwind CSS, npm*

Sept 2025

courseload.vercel.app/

- Engineered a scalable course overview interface by applying object-oriented design principles to **three** core React components.
- Streamlined data formatting by using the JavaScript map() function to dynamically structure each course, simplifying future updates and maintenance.
- Enhanced user experience by personalizing the front end with Tailwind CSS, resulting in a navigable and visually consistent web page.

Acme Rockets | *HTML5, Tailwind CSS, npm, Javascript*

Sept 2025

acme-rockets-uees.onrender.com

- Increased front-end development speed by **20%** by using **Tailwind CSS**, which reduced the need to write out individual class properties.
- Enhanced the website's responsiveness and adaptability to different device frames by **50%** by implementing **media queries** to dynamically adjust the layout.
- Improved user interaction and navigation by using JavaScript to interact with the DOM, enabling dynamic and animated menu toggles with CSS animations.

Little Taco Shop | *HTML5, CSS, Javascript*

July 2025

little-taco-shop-sigma.vercel.app/

- Created an organized website foundation by using standard **HTML5 elements** (forms, sections, headers, footers) to ensure high accessibility.
- Designed a dynamic and accessible user interface by integrating modern **CSS Grid and Flexbox** layouts.
- Increased styling efficiency and maintainability by utilizing **CSS variables** for abstraction, enabling faster design updates.
